INTRODUCTION

Mastercard In Control® Platforms are an industry-leading VCN (Virtual Card Number) solution that help to streamline B2B and Travel payments, offering increased efficiencies, enhanced controls, more security and better data.

The platforms offer connectivity for B2B technology solution providers to make secure payments, by VCN, to suppliers in both B2B and Travel categories. Unique, dynamically generated VCNs make payments to suppliers flexible, easy and secure.

Value chain of an In Control solution using Mastercard® Engage-qualified partners

TO OFFER A VIRTUAL CARD PAYMENT OPTION TO YOUR COMMERCIAL CUSTOMERS USING MASTERCARD IN CONTROL® THROUGH A MASTERCARD® ENGAGE-QUALIFIED PARTNER YOU WILL NEED TO:

1. IDENTIFY THE RIGHT PARTNER

Identify the partner best suited to meet your bank's payment strategy or customer needs.

Find In Control-enabled partners below.

Partner Name	IN CONTROL CONNECTIVITY MODELS			Other Info	
	Alliance partner <small>This offering is part of a broader strategic alliance agreement that the partner has with Mastercard</small>	Reseller <small>This offering is part of an In Control reseller agreement and broader strategic alliance agreement</small>	Technical operator <small>This offering is limited to providing technical connectivity to In Control for VCN generation using the In Control APIs</small>	End customer segment	Geographical scope of the license

2. CONTACT YOUR MASTERCARD REPRESENTATIVE

Contact your Mastercard representative for implementation support to connect with a Mastercard Engage-qualified partner for In Control for Commercial Payments or In Control for Business Travel.

FOR MORE INFORMATION

1. MASTERCARD IN CONTROL® FOR COMMERCIAL PAYMENTS

ICCP (In Control for Commercial Payments) helps differentiate issuer VCN solutions for corporate clients, with value-added services that help to develop a best-in-class commercial card program and a better user experience for end-corporates.

2. MASTERCARD IN CONTROL® FOR BUSINESS TRAVEL

ICBT (In Control for Business Travel) is an industry-leading, virtual card solution for centrally booked travel via a TMC (Travel Management Company) or an OBT (Online Booking Tool). ICBT drives operational efficiencies and optimum security because only ICBT generates a dynamic card number for each transaction and captures enhanced travel data to support policy audit and control.
